

Managing Student Data

In 2018, the law changed in relation to personal data. New GDPR regulations mean that we must ensure data is kept safely and is not used unlawfully.

Your rights and responsibilities as a student at UCB can be found in this [video](#). All Society Leaders must watch and understand this information to ensure they are compliant.

As a Society Leader, you must:

- Not share the data of your members
- Only use the official communication channel provided by the Guild to communicate with members. You can of course have groups on social media or WhatsApp, however, students must have the opportunity to join rather than be pressured/added automatically in the first instance.
